The Trees of our Forests: Peril and Promise. Don Scallen is a nature writer, science teacher and president of the Halton/North Peel Naturalist Club. Join Don for a hike through the forest ecosystem of Glen Haffy Conservation Area to identify trees and discuss the introduced pathogens now attacking ash, beech and butternut. Don believes that a worthy response to the loss of these trees is to diversify our forests by planting a wide range of native trees. As a symbol of this response Don will offer an oak or hickory seedling to each participant.
